# TRADE-NAMES in the LIGHTING and LAMP INDUSTRY

## A SECTION OF

### *Lighting and Lamp Trade Directory and Catalog*

Identification of the manufacturers of products with trade names is facilitated by the use of this list. These trade-names are alphabetically arranged, and are set in bold type. When the trade-name is followed by a word or phrase set in light faced type, this is done so as to make it easier to associate the trade-name with the line it represents.

CLASSIFIED DIRECTORY  
SECTION

*of Lighting and Lamp Trade  
Directory and Catalog*

On pages 33 to 160 are found the names of the manufacturers of the many items which comprise the lighting fixture, lamp, metal furniture, parts, accessories and wiring devices lines. These are arranged in alphabetical order of the items listed, and under each heading are found the names of the firms who manufacture them. The position of the firm name is determined by the initial of the chief word in the firm style. By consulting the classified directory index and turning to the page given, or locating the item by turning the pages in order until the proper one is found, one is enabled easily to find the manufacturer of any item which appears in this volume.

## VALENCIA— A Spanish Gem

Rich in its elegance—combining shield, coronet and color in rare combination of the designer's art—the Globe Valencia Line fulfilled every hope we had in developing it.

Hardly a week passed after its inception before these fixtures were hanging in many dwellings and apartments—the builders simply "fell" for this design.

It's different.

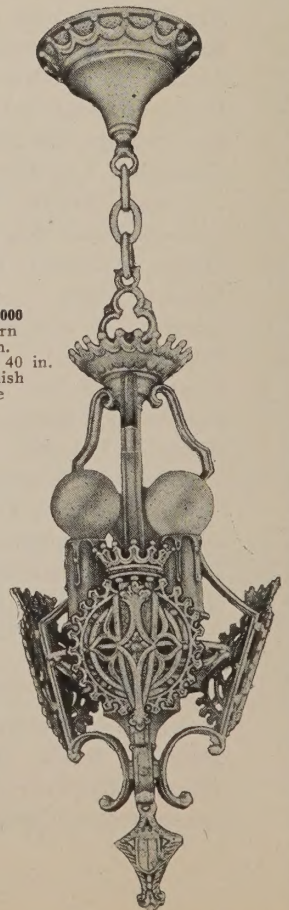

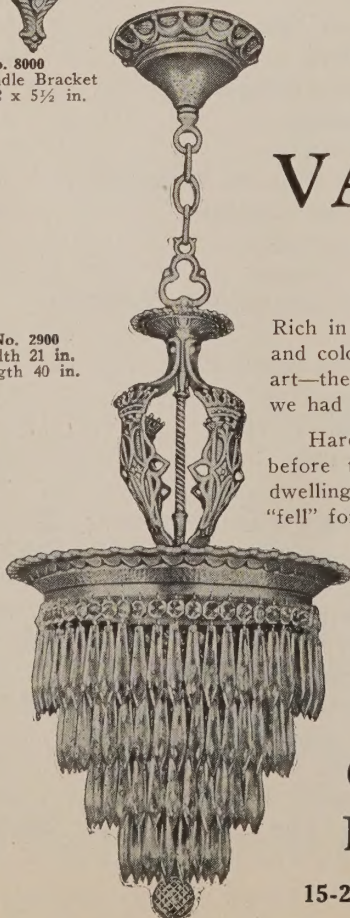

It tones up its surroundings.

It's up to the minute.

It is quickly delivered and reasonable.

Also, it is fully protected by patents.

## *Periods and Popularity*

Following closely the trend of public thought in home furnishings—the demand for period lines in furniture and other decoration—Globe Lines are built upon a definite plan of meeting the present demand. A demand which made itself evident immediately the first of these period lines made its appearance—a demand which dealers and jobbers are capitalizing.

These pages show a few of the many popular period lines that are winning the big operations in 1927. Many a dealer attributes his big profits to Globe lines—and there is much exclusive territory available.

## The Lombardy Line Italian Renaissance

The Italian Renaissance design ushered in an entirely new conception in fixture design. The beautiful effect of old gold and Italian marble lends to these fixtures a tone of richness that harks back to the exquisite appointments of the Italian Renaissance.

This is a real profit line—most exclusive and original. Non-imitable and fully protected by patents.

Finished in antique gold with real marble effect ornamentation and typical color trimmings.

## PLANETLITE UNITS

PLANETLITES are sold under a strict policy of protection. When a dealer is selected to sell Planetlites, he has absolute assurance that he will be protected and will so be exempt from the price-cutting tactics which frequently take all the profit out of fixture sales.

There is no worry connected with the handling and sale of Planetlites, either from the merchandising or mechanical angles. The unit is patented in every feature and is not subject to competition by units which are "just as good." It is accredited as most efficient for the diffusion of light, giving a greater volume of good soft illumination per watt than other units. This, attested to by the photometric chart of the Electrical Testing Laboratories, shows a light output of 82%. It is trouble free and easy to maintain.

Planetlite is made in a variety of designs which makes it possible to get a suitable unit for every style of decoration or architecture. Among the places in which Planetlite can be used to advantage are: stores, halls, offices, churches, schools, public buildings. The ease of selling Planetlite enables you to concentrate upon the fine business to be had in your locality.

Used at entrance to Church of Cross,  
Cleveland

This Kayline Installation, the Church of the Cross, Cleveland, is used by Nela Park engineers as an example of perfect church lighting in their great School of Lighting

## Our New Special Designing Department

Can furnish expert service on all jobs requiring large or unusual equipment not found among standard fixture designs.

This service, offered to dealers handling regular Kayline Fixtures, is not limited to churches or designs of any particular style. Sketches can be furnished for any requirement from a small period residence to a large cathedral.

Complete folios are prepared showing full lines of fixtures that were used successfully in banks, churches, hotels, theatres, schools, etc.

The greatest array of beautiful patterns ever assembled enables our designers to create magnificent fixtures at most reasonable prices. Installations to our credit show that Kayline can secure contracts on the merit of design alone.

A set of plans is always required together with the appropriation allowed for the fixtures before our designers can offer a proposal on a special job.

## WARWICK ~ ~ MANOR LIGHTING FIXTURES

Worked in Renaissance ornament, the Warwick Manor Line represents true English designs.

Because of the demand for matched fixtures to use throughout homes of better class, striking characteristics were incorporated in this line.

It is linked together in an admirable manner making a complete installation very easy and creating a more beautiful effect.

Only Bronze castings are used, the standard finish being a toned Bronze bringing out the natural quality of this metal.

# OLD COLONY COLONIAL *Lighting Equipment*

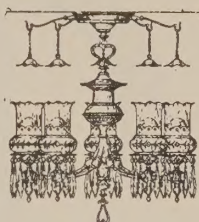

F-01109

The charm of true Colonial design, brought out perfectly in the Old Colony Line, is becoming more popular each year.

In this new line nearly all the quaint old ornaments such as the fount, filligree, wind-blow globe, prism, are used to greatest advantage.

Eighteen designs of unusual originality make up the line, offering wide variation for Colonial homes.

Made of Brass, finished in "Pewter and Old Brass," the combination of design and finish presents a quaint effect most desirable in Colonial types. The Old Brass finish is also standard for the line.

There is hardly a place where maximum efficiency is required that cannot be perfectly lighted with the new Kayline-Radiant Unit.

The new shadowless globe, made exclusively for Kayline, provides 20% greater efficiency than any other globe on the market. Three separate characters of ornament are applied — Classic, Gothic and Romanesque. Broad usage is allowed when considering the wide variation of types—suspension and close ceiling—with or without ball lamps—with plain, decorated or etched glass—plain, semi-decorated or ornamental ring types—five sizes of glass 8", 12", 14", 16" and 18"—two hundred and sixty-four original designs.

All ornamental parts are of cast Bronze, while utmost care is given to rigid construction to insure a quality unheard of at the prices placed on these units.

## STAPLE and DISTINCTIVE

Art Craft lines are literally translations into metal of the spirit of Beautiful and Harmonious Home Decoration.

The lines here shown are stories in brass which are as truly interpretations of the Colonial Period as a novel or a painting would be.

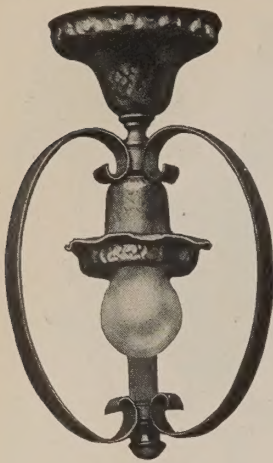

When hung in their proper setting in the home, the effect is to heighten the impression of the stately dignity which was characterized in early American days. The finishes are consistent with the grace of the outline and will be as enduring as the beauty of the design itself.

## An Extremely Popular Line

Art Craft wrought-iron fixtures are perfect in their ability to express the moods which actuated the designers of the originals of which they are the present-day adaptations.

This line has been proven highly successful in large operation work. One dealer procured an order for fixturing a complete operation of 500 homes with these Art Craft wrought-iron fixtures.

## WELL BUILT *and* DURABLE

These designs are adaptations of the Colonial Period when well-rounded, sober, yet graceful lines were the spontaneous expression of the mood of the people.

The smooth unbroken surfaces of the metal, and the equally dignified cut-glass ware were two parts of a complete whole necessary to carry out a feeling—and these fixtures are perfect in their retention of the ideals which first gave their originals being.

## A Complete Lighting Fixture Service

As designers and manufacturers of lighting fixtures it has been our privilege to work in co-operation with dealers and architects on buildings ranging from handsome to modest homes, enormous apartment houses to theatres and schools.

It is particularly in connection with public building work that we have established a reputation. We are very proud of the main fixtures we have installed in the auditoriums of large theatres, schools, churches, synagogues, etc.

For the most part, our work lies in producing lighting fixtures made from bronze, copper, brass, wrought iron and wood fibre, which adhere artistically to the architectural period after which the building is designed. From Gothic to Colonial, from Italian Renaissance to Spanish and Tudor, we can show examples of our fixtures which are authentic in every line and detail, and which harmonize perfectly with the architectural exteriors and interiors for which they were created.

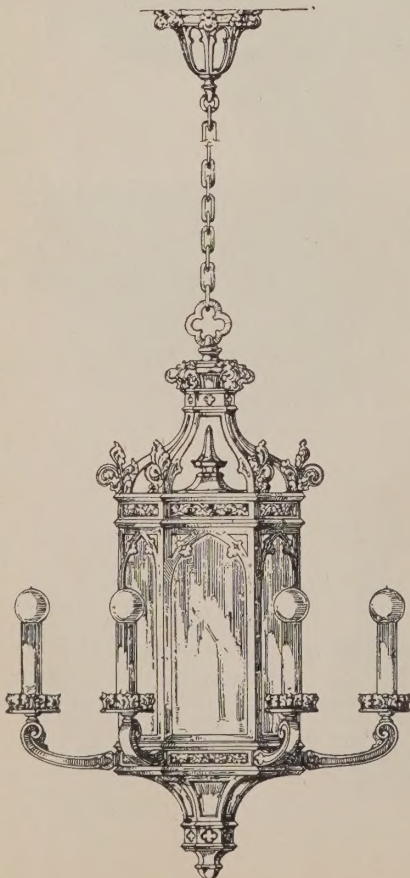

We are in a position to either apply our particular ability as lighting fixture designers toward creating an original series of lighting pieces for a job, or to work with an architect who has sketched his own ideas for the lighting scheme and who seeks a manufacturer to work them out in detail and to build them.

## Installations

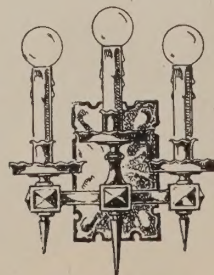

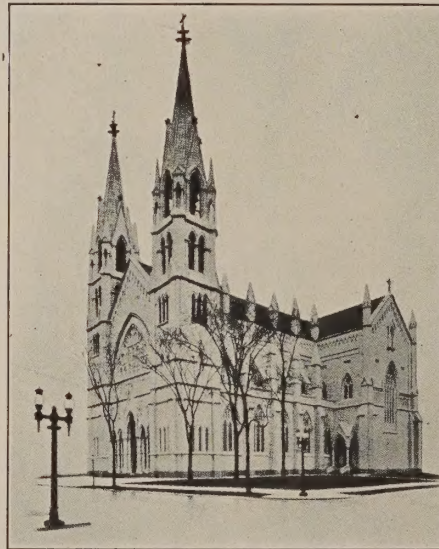

The two photographs shown in the accompanying plates are typical of the type of buildings in which our fixtures have been extensively installed. In neither of these two specific cases was the budget for lighting equipment large, nor was either in any way exceptional. They simply represent the average type of installation ordinarily met.

We can furnish, if necessary, photographic proof of some of our more impressive installations, as well as on some even smaller ones.

The fixtures illustrated furnish an idea of the artistic possibilities of our special designs.

### A Stock Line of Artistic Fixtures

In addition to our special creative department, we carry a select standard line of lighting fixtures.

This stock department has done yeoman service on many occasions when fixtures of the highest type were wanted, and the budgets held no provisions for their costliness. It is on occasions such as these that our standard fixtures, so unusual in their conception, please clients, because they give an impression of having been especially designed for the installation.

### Information Required for Designs and Estimates

All that we require to be able to submit our ideas

and bids are complete sets of plans and your specifications, if any, for the lighting equipment. Whether you direct our progress or have us exercise our own initiative, the outcome will be the same, namely, complete satisfaction.

We maintain a staff of representatives throughout the country who will be pleased to render you their personal attention.

Should you desire any specific or general information, or should you like a collection of sketches which have been carried through to pleasing installations, simply address our headquarters—we shall be always at your service.

## Style Leadership—Complete Lines Backed by Complete Service!

**L**IGHTOLIER manufactures in the largest factory devoted to decorative illumination, a line of over six hundred residential fixtures, commercial units and artistic lamps.

The variety of style and periods in these goods is as wide as skilled and faithful design and craftsmanship can produce. Colonial, Spanish, English, French—fixtures and lamps of every description—are made by us in beautiful finishes that enhance the basic design.

The products are many—but the quality is one—the very best. And prices, because of nation wide distribution and years of experience, are strikingly reasonable and drive home the fact that beautiful lighting equipment is not necessarily expensive.

Behind these products stands a skilled force of seven hundred people, eager to serve you in your business. Prompt deliveries are assured from our huge warehouse stocks. You never have to wait for Lightoliers because they are already waiting for you.

Hundreds of dealers have found it tremendously worth while to do business with us. If you are not in possession of our catalogs, "The Green Book of Decorative Lighting" showing one hundred and twelve pages of our residential fixtures, or "Are You Paying Too Much for Too Little Light" showing our new Light-O-Day and Da-Ray commercial line, or our beautiful catalog of artistic lamps—we will be glad to send them to you on receipt of your request.

## Based on a Policy of Integrity

Behind every S & A fixture you sell is an organization which functions in perfect co-ordination. A designing staff which senses the changing styles in decoration and brings to them the breath of the master. Craftsmen to whom moulding metals into beautiful fixtures is an ideal. A sales staff composed not of order takers but veterans to whom going out their way to help you is a part of the day's work. And a human policy of dealer co-operation which believes that the customer is invariably right. These are the qualities upon which S & A is built and upon which you can stake your reputation when you sell its fixtures.

GuthLite represents the first big advance in years in commercial illumination. A *super-illuminator* in which diffused light is controlled, giving more light where most needed.

Adjustable reflector controls the direction of light vertically and horizontally, also the volume of light for ceiling illumination.

Totally enclosed. Wide light distribu-

tion. Uniform intensity. Low brightness at the source. Quick, easy removal of the globe for cleaning and relamping.

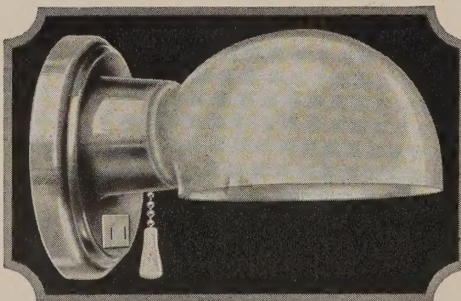

Beauty of design is here combined with remarkable efficiency. Proclaimed the greatest invention since Brascolite.

Plain and decorative types, priced surprisingly low. Write for Exclusive Sales Proposition and literature.

### The New and Improved **AGLITE** Porcelain Enameled Unit

The symmetry, compactness and permanence of the new, improved Aglite have made it the most widely used illuminator of its type.

Always clean. Always like new. Three coats of *permanent* porcelain enamel fused on at 1,600 degrees. Will not discolor, rust or

tarnish. Standard colors: white or ivory.

Now made with porcelain tassel pull chain. Convenience outlet for attaching electrical appliances, if desired. Saves cost of wiring for separate wall or baseboard outlet. Write for literature and new low prices.

## ALCAZAR LINE—Showing True Spanish Influence

At this time thousands of homes are being built in modified styles of Spanish and Italian. Correct lighting of these homes is a serious problem, that is, at a reasonable price.

You can solve the problem easily and profitably by showing the *ALCAZAR LINE*. Send for our folder illustrating the entire line. There is an Alcazar Lighting Fixture for every room in the house.

## Authentic Period Bronze Fixtures

**S**PECIALIZING in bronze lighting fixtures, we are in a specially strong position to serve dealers expeditiously and understandingly from our exclusive stock designs, as well as giving special designing attention to installations requiring extraordinary treatment and intended for use in all manner of public buildings, churches, theatres, fine residences, etc.

We mail on request a portfolio of sketches presenting Heraldic Bronze Fixtures in English, Italian and Spanish periods.

Besides bronze, we also manufacture an extensive line of hand-wrought iron fixtures for every purpose, as well as bronze lanterns for outdoor use.

**Whitacre bronze lighting equipment is not only  
known for its quality but for its extremely moder-  
ate cost**

## DESIGNS BY BAYLEY

Architects and Dealers have learned to know that the job is O. K. when the designs are by Bayley.

Because they are supplied to fit the lighting and architectural scheme; because even in the stock designs the range is so great as to allow for proper selection, and because they create artistic decorative effects in residential and commercial fixtures which sell the jobs.

# Waterford Adaptations

"It is fitting that these 16th Century reproductions by Harrison — authentic in every line and curve — should be made in the Waterford and Old Irish Periods."

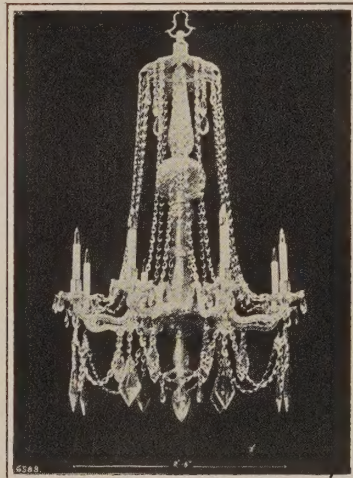

No. 1875

These exquisitely graceful pieces, with their hand-bent arms, their glistening strings of crystal garlands, their scintillating pendants and their beautifully proportioned candle cups

No. E 3504

No. E 6588

Harrison period and classical reproductions are made in the best traditions of the time represented by each piece. The introduction of modern electrical lamps into old chandeliers is done in a manner that does not spoil their realism.

Duo-Tone finish No. 110 is a blending of brown and gold, high lighted in gold, harmonizing perfectly with the neutral tints now so generally used on the walls and ceilings of the homes of today.

GROSS

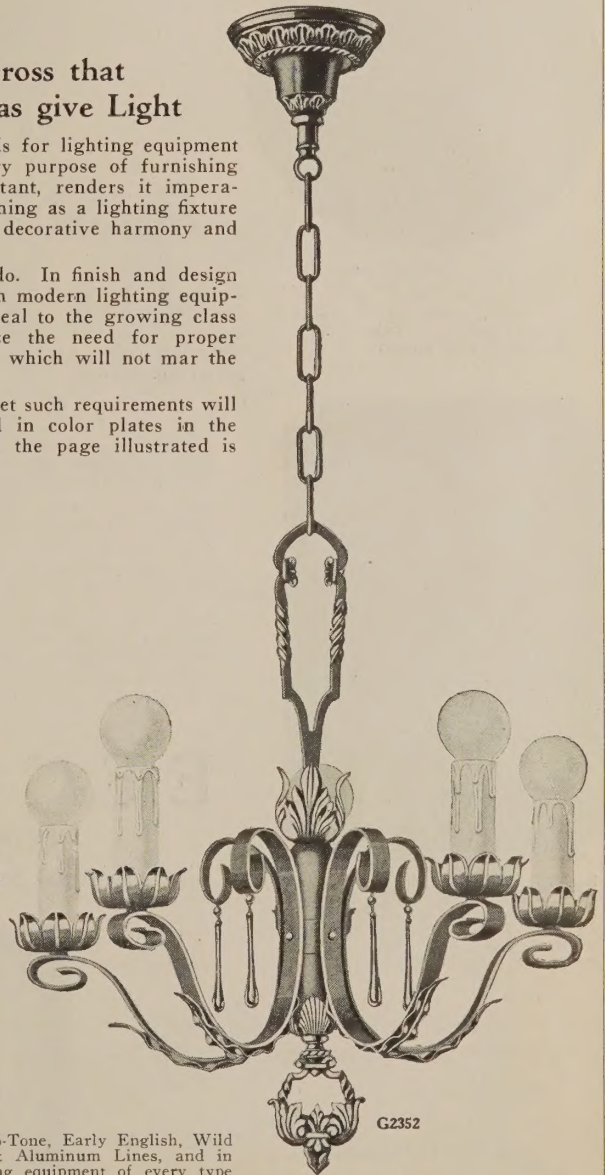

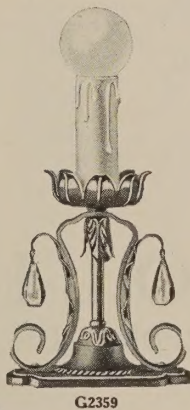

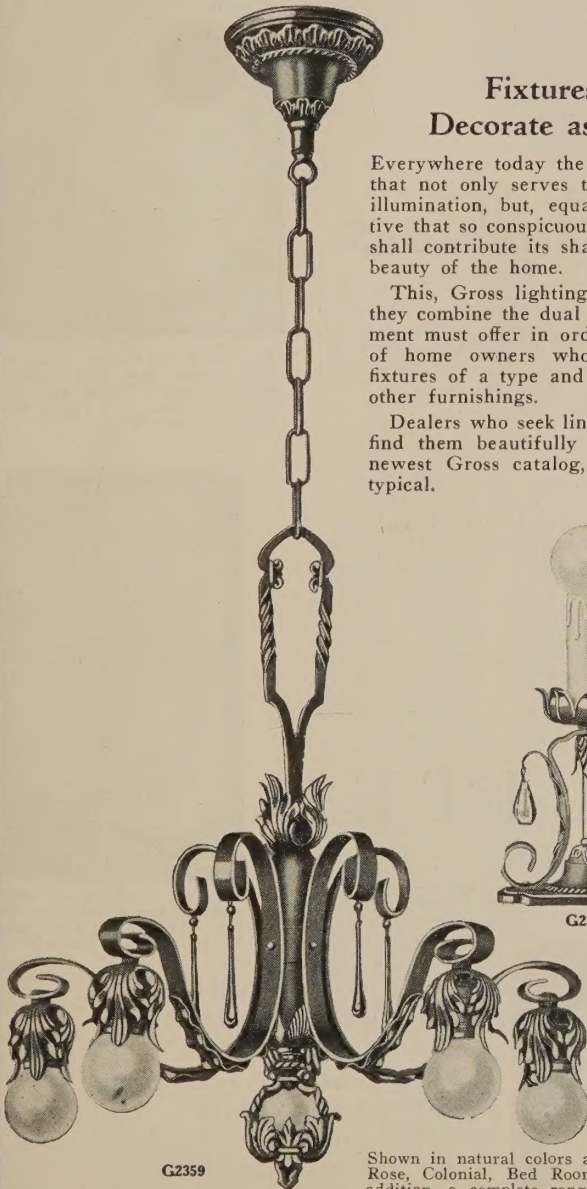

Fixtures by Gross that  
Decorate as well as give Light

Everywhere today the demand is for lighting equipment that not only serves the primary purpose of furnishing illumination, but, equally important, renders it imperative that so conspicuous a furnishing as a lighting fixture shall contribute its share to the decorative harmony and beauty of the home.

This, Gross lighting fixtures do. In finish and design they combine the dual role which modern lighting equipment must offer in order to appeal to the growing class of home owners who recognize the need for proper fixtures of a type and character which will not mar the other furnishings.

Dealers who seek lines that meet such requirements will find them beautifully illustrated in color plates in the newest Gross catalog, of which the page illustrated is typical.

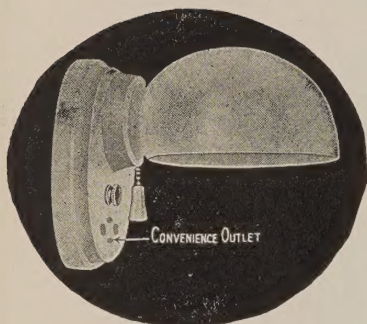

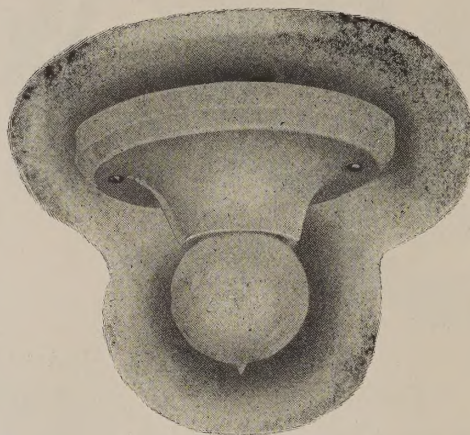

Shown in natural colors are the Duo-Tone, Early English, Wild Rose, Colonial, Bed Room and Cast Aluminum Lines, and in addition, a complete range of lighting equipment of every type for interior, exterior and commercial lighting.

## Business Builders

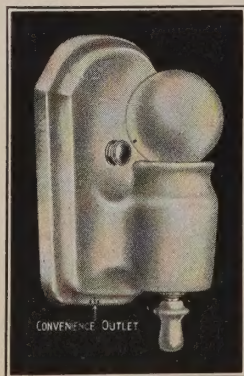

The presence of Efcolite fixtures in your showroom will open up new business for you. Efcolites have a thousand uses and everybody buys them. Customers who did not expect to buy will be tempted to do so, and those who had intended to buy sanitary fixtures will choose Efcolites when given the chance.

The graceful beauty and snowy whiteness of these kiln-baked, vitreous pottery units are irresistible. Each unit, no matter what its style, is made in graceful lines that make it artistic as well as useful. The surfaces will always stay white, uncrazed, unstained, untarnished and uncracked. There are no corners to collect dirt, and a wiping restores them to glittering whiteness when soiled or dusty.

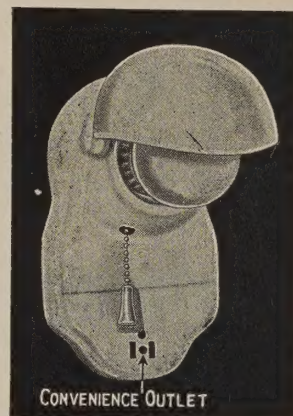

Each unit is equipped with association sockets, wired ready to hang and may be installed in five minutes. They are easy to handle and will not deteriorate in stock, being separately packaged.

# THE PERFECLITE COMPANY

MANUFACTURERS DESIGNERS ENGINEERS

LIGHTING EQUIPMENT

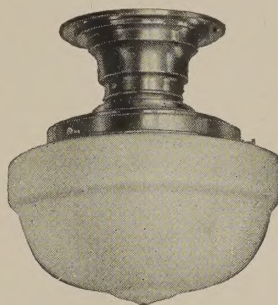

CLEVELAND

OHIO

## PERFECLITE PRINCIPLE

All Perfeclites are equipped with the regulation battery of patented mirror reflectors for the redirection downward of all upward rays of light from the lamp.

## "ONLI" SAFETY HANGERS

Gravity type self-locking Safety Screwless mechanism—original, unique, safe—dependable. First in the field and still leading—5 seconds to remove or install any standard fitter globe!

Standard ceiling and pendant type "Onli" patented hangers depicted above are manufactured in 4, 5, 6 and 8" fitter sizes. Also supplied in three ornamental designs, suitable for the smartest shop and office installations. ALSO FURNISHED WITH GLASSWARE—THE NEW MONARCH LINE.

The standard pendant and ceiling type Perfeclites shown above are made in five globe sizes from 10 to 20 inches in diameter; also in plain and decorative glassware and hangers. The complete line is the largest commercial lighting line on the market today, containing special designs with complimentary brackets and auxiliary units.

## GYM UNITS

In addition to the regulation Perfeclite Gym Unit shown above, the regular line contains several other types; all metal for extremely rough usage, screwless holder types, etc.

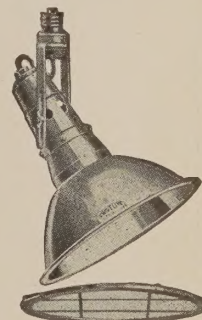

## EXIT BOXES

A wide variance of standard designs and special types—including signal boxes, are manufactured by this company.

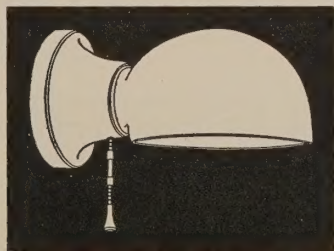

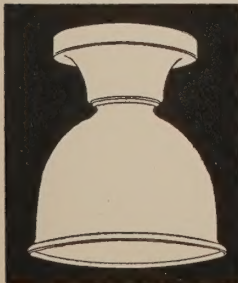

## SALESLITE

Our show window lighting equipment is of special unbreakable construction extremely light and flexible—the Swivelite in particular has gained widespread attention—screws in like a lamp and can be instantly directed to any part of the window. A lighting innovation that promises to become a lighting necessity.

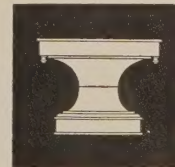

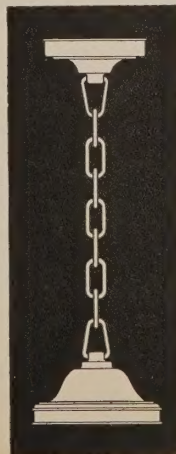

## SWIVELITE

Also furnished with convenience receptacle.

## PORC-O-LITE UNITS

A new Perfeclite feature product for 1927—genuine porcelain units—equipped with novel patented locking ring, all mechanical parts concealed and allowing shade angle adjustments on brackets.

## STAR SAFETY HANGERS

For commercial lighting globes is manufactured under "ONLI" Safety Screwless Holder patents.

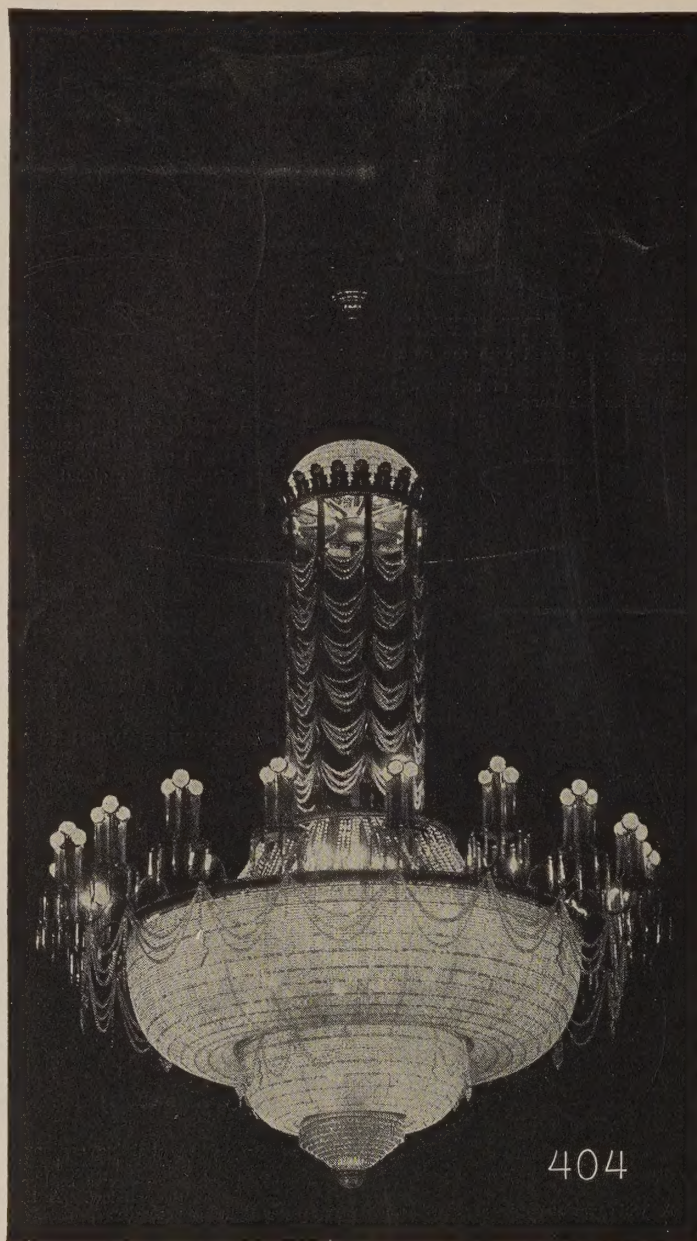

Manufactured in standard ceiling and pendant types—4 and 6" fitters.

## WEINSTEIN—*the House of Crystals*

*The Weinstein  
Crystal Exposition*

*The 1927 Weinstein Catalog contains a complete exposition in crystal. Hundreds of designs in fixtures and brackets — complete new lines for every requirement and scores of large and medium size pieces for theatres and public buildings and other work.*

**H**ARDLY an important job, whether of national or local importance, but what the House of Weinstein is called in to figure—and frequently specified by the architect for the crystal work because of the definite knowledge that the House of Weinstein knows how to do it—and delivers the goods.

Hundreds of theatres, movies, entrance halls and residences, department and specialty stores, pay glittering tribute to the skill and execution of Weinstein experts in Crystal.

Our 1927 line includes several hundred stock designs in crystal fixtures, brackets, beaded dishes, etc., and we can supply from stock the largest assortment of crystal parts of all description and make to order crystal fixtures to special designs.

# CHAMPION LINES ARE

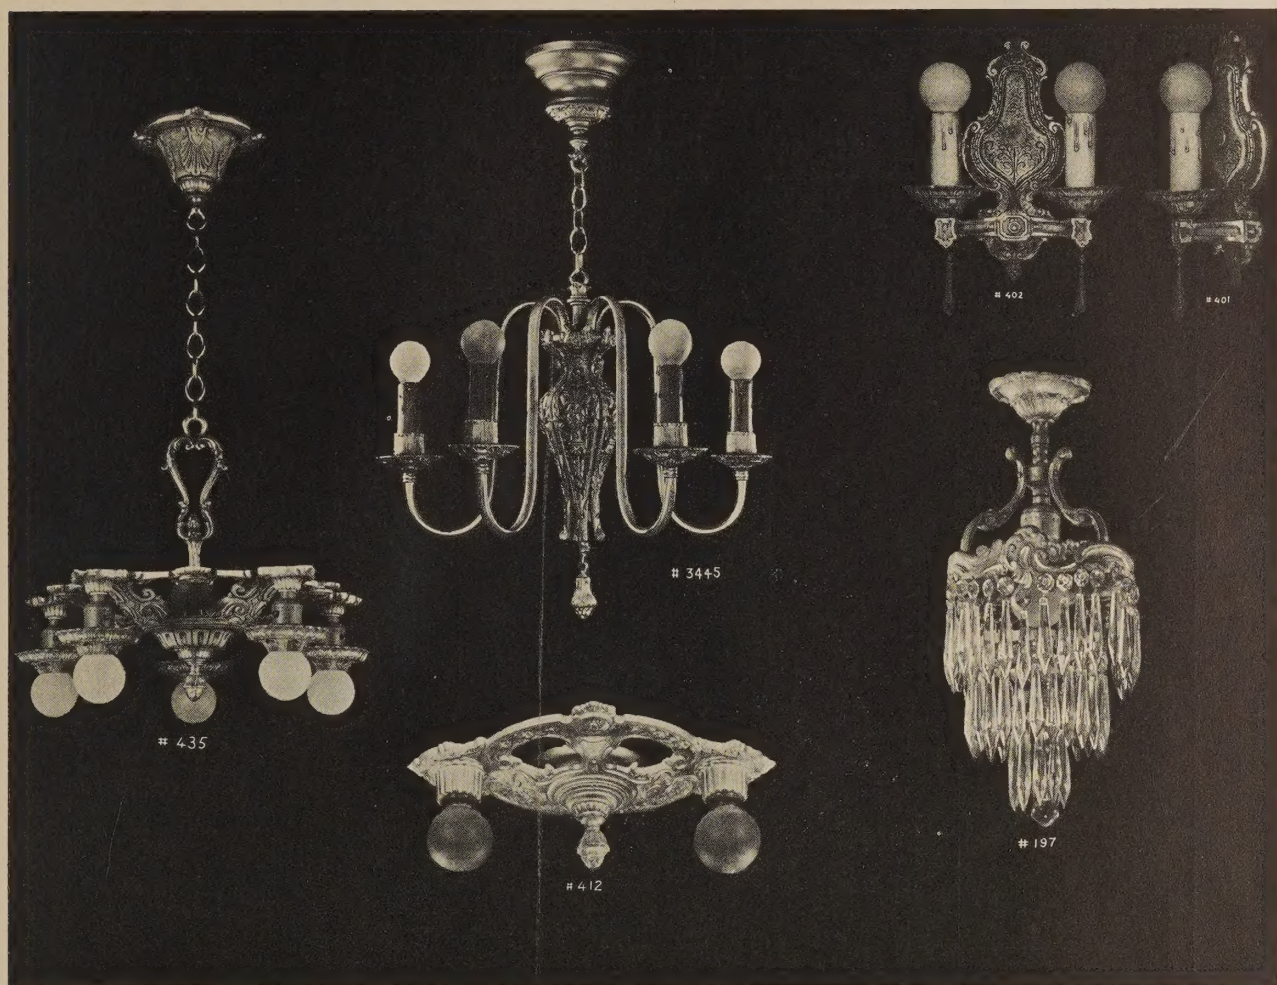

CHAMPION lines are made to be sold to the majority. They are designed to supply dealers with popular-price fixtures for which there is a year around demand. Staple designs, sturdily built and which can be used in most any type of home.

For the dealers who concentrate on fast-turnover lines, Champion fixtures are proven "best sellers." Being priced right, there is a real profit in their handling.

# CHAMPION LIGHTING

# "Bread-and-Butter" LINES

## *The New Champion Sales Portfolio Is a Big Sales Help*

We have prepared an elaborate loose-leaf portfolio showing the complete Champion Line. Distributors will find it of immense help in selling the dealers, and dealers in selling the consumer. There is a copy for you.

Illustrated are a few of the many numbers in the Champion fixtures, showing variety of design. New lines are continually being added.

### **CHAMPION DISTRIBUTORS ARE PROSPERING**

Champion fixtures—Made Right—Packed Right—Priced Right and Merchandised Right, is the reason.

## Lyman Lamps

Designs and Finishes that always anticipate style trend. Strictly authentic Period adaptations that meet and blend with prevailing decorative practice.

These two pages of Lyman Designs indicate the faithfulness with which the very spirit of Period motifs has been

wrought into our products. Yet every piece is absolutely an original creation stamped with Lyman individuality.

**The Periods:** Floor Lamps in Romanesque, Modern French, Colonial English, English Georgian, Norwegian. Table Lamps in Colonial, English, Semetic, Venetian, Modern English, Modern Danish.

**The Finishes:** Swedish Iron, Antique Copper, Old English Brass, Mottled Antique and Brass, Monastery Bronze, Black Enamel and Gold, Van Dyke Polychrome, Bolivian Gold, Etched Pewter and Etched Copper.

Also we illustrate two numbers in Lyman Electric Smoker Lighters, which come in many finishes and designs, including boudoir designs and finishes for the feminine dressing table.

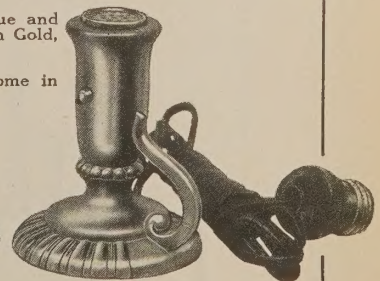

Two other elements that make Lyman Lamps distinctive and salable are their honest workmanship and materials, and their amazingly moderateness of price. While they are high-grade and individual in every sense, they are purely commercial in their pricing.

New designs, new finishes continually are going through the plant. All are typical of the handiwork presented in the models shown.

## Creators of Lamp Fashions

IN every industry there is always a leader—a conspicuous outstanding organization to which automatically one turns when he seeks the authentic, the salable, the universally-known product which not only sets the mode, but anticipates it.

In lamps it is necessary only to say “ALMCO” for one to recognize leadership and significance in the lamp field.

If you go anywhere in this country, you will find invariably that the store priding itself on leadership features Almco products.

You will find it an exhilarating experience to visit the magnificent Almco Galleries in New York or Chicago and see the results of Almco ingenuity in creating lamp fashions . . . the fine and exclusive things that have made the name of Almco nationwide in reputation.

## Double the Lamp Appeal With Argonne Shades

Into every Argonne silk shade is built the two great factors of salability

QUALITY

VALUE

Thus, design, workmanship, silks, trimmings, all must meet a standard to achieve these two cardinal points.

After All—

Argonne shades have a reputation to maintain—gained on their initial introduction and which has resulted in their permanent place in all the leading stores of the country.

# KERNES LAMPS

THE beauty and charm of Kernes-made lamps and shades present an instant appeal to the discriminating purchaser who seeks something with individuality yet priced for a satisfactory profit.

A wide range of prices, and several patented articles—something out of the ordinary—make the Kernes line a profitable one to tie to.

The "Velvet-Lite" lamp combines the function of Junior and Bridge—operates without adjustment and gives a beautiful soft light not cast by the ordinary lamp. Ask our representative to show you the "Velvet-Lite."

## Test Your Purchases

Junior  
No. 3802

THE first consideration in the selection of your lamps and furniture is "Will it sell?"

Finish, design, originality, mechanical construction and value decide all this. If your purchases are made in line with these principles, you are operating successfully.

Artistic is the talk of the industry and owes its phenomenal growth to strict adherence of these important factors.

You are in a position to benefit by the advantages of a successful institution.

# *A word to the wise*

*Are you slighting a very important part of your business?*

There is a decided tendency in lighting effects for the modern home toward the use of a number of small lamps and shades advantageously placed instead of the old-fashioned large lighting units.

Do not neglect the small shade end of your business. The same care should be exercised by the buyer in selecting the manufacturer of the candle shades his department is to sell as he uses in selecting bridge or junior units. If you offer the correct merchandise, you will be surprised to find that the volume of sales for small shades will nearly equal that of the larger sizes.

Our many years of specialized experience in designing of original creations in this field has given us a recognized reputation for leadership.

Our line, comprised of candle shades, shields, boudoir shades, table shades, bedlights and small lamps, will surprise you with the wonderful values offered in creations executed with ingenuity and imagination.

*Lamp Shades*

THIS name on a parchment lamp shade immediately assures its individuality.

For many years now Caroline A. Burke shades have been outstanding in lamp departments throughout the United States and have been the standard in design and workmanship.

So much so that the buying public now is accustomed to look for the signature of Caroline A. Burke and to accept it as a guarantee of quality.

Each season we create new ideas in treatment for our hand-painted parchment shades — those delightful colorings and designs that at once identify the Burke shades.

Along with these hand-painted shades, we feature our exclusive, genuine, sheepskin parchment shades laced with leather thongs, very much in the fashion.

Shades and globes of CREMAX, ANTIQUE, MONAX and ALBA Glass, plain and decorated, for use in every room of the home.

without sacrificing too great an amount of light. Cremax transmits a rich cream-colored quality of light, free from tones of green, evenly diffused, and of great warmth. Cremax furnishes a background which harmonizes delightfully with many different types of decoration for home lighting purposes.

## Living Room

Here are shown a few of the many attractively decorated shades available for use with candle, bracket, or pendant luminaires in the living room. Furnished in "Cremax," "Monax" and "Antique" Glass. Every shade equipped with glass disc or fibre-insulated holder (see opposite page).

## Reasons for Use

In selecting lighting equipment for the home, there are two prime factors which must be given careful consideration:

**First**—The increasing tendency toward the use of shaded light. It is accepted that all light sources should be shaded, and it is of paramount importance that the medium used shall also create artistic and decorative lighting effects. Because of its almost unlimited decorative possibilities, glassware is particularly adaptable for this purpose. In addition, lighting glassware possesses a utilitarian value: its colors are permanent, it is very easily cleaned, and it will not deteriorate from constant use.

**Second**—The introduction of new type inside-frosted Mazda lamps has rendered obsolete many existing types of residential lighting glassware. This has made necessary the preparation of new shapes by means of which these new lamps can be shaded both adequately and artistically.

## "Cremax" Glass

So called because it is basically Monax Glass to which has been added ingredients that supply the rich cream tint of the finished product. Cremax—a natural-colored glass—is the latest development from the laboratories of Macbeth-Evans Glass Company. For several years, there has existed a demand for a tinted glass of this character. Many trials were made, but not until shortly before the appearance of this catalogue was a glass perfected which seemed in every way to meet the requirements of color

## "Antique" Glass

Frequently mistaken for crackled, Antique Glass differs entirely both in appearance and method of manufacture from the ordinary frosted glassware from which particles of surface glass have been removed by a coating of glue. Antique Glass procures its surface character during manufacture rather than from an applied process. It is furnished in crystal and golden, the latter being a natural-colored glass, not an applied tint. The popularity attained by Antique Glass within the past few years has encouraged its employment for many lanterns, shades and cylinders, a few of which are illustrated on these pages.

## "Monax" Glass

A truly remarkable diffusing glass which transforms the uncomfortable brilliancy of high-powered lamps into usable and evenly diffused illumination with a minimum amount of light absorption. Monax globes and shades, plain, or decorated simply

with a colored band, are especially effective for lighting the kitchen and bathroom where a good working light is to be desired rather than a decorative effect.

## Luminaires

The term "Luminaire" is applied to those metal portions of lighting equipment commonly called "fixtures." Lighting equip-

ment is rapidly being considered less a fixture and more an article of furniture in the home. With the increased use of "Elexits" in wiring houses, the day is not far distant when Luminaires will be

### Breakfast Nook—Sun Room—Halls, etc.

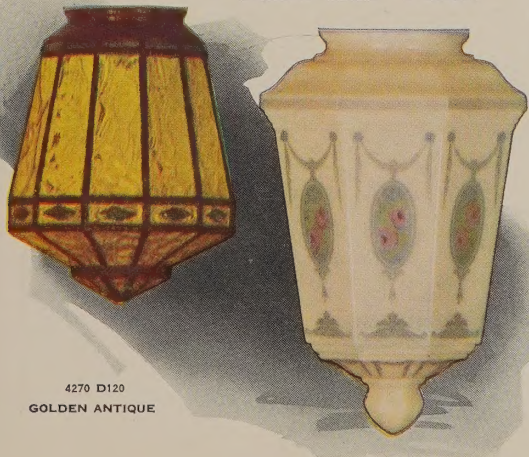

Many Macbeth-Evans globes and shades are adaptable to use in special surroundings, such as breakfast nook, sun room, sleeping porch, upper halls, etc. Above are illustrated three shapes which are proving popular for this purpose.

an integral and important part of home furnishings and will be transported as such when a tenant or home owner moves from one house to another. Therefore, it is important that Luminaires be chosen with a consideration of the glassware to be attached—harmony between the two is essential.

### Lamps

Five new Mazda lamps now replace approximately forty-five shapes formerly considered necessary to satisfy general lighting requirements. The new lamps, frosted inside, may be secured in the following sizes: twenty-five, forty, fifty, sixty and one hundred-watts. Each Macbeth-Evans shade and globe is scientifically

### Lower Hall—Porch

"Cremax" and "Antique" Lanterns for lower halls and porch create valuable "first impressions" of the home through distinctiveness in design and treatment—two examples above.

### Bedrooms

Something dainty for the master room, children's room or guest room. Two designs above are selected from many available in center globes, side brackets and boudoir table shades.

designed to accommodate one of these sizes. Your dealer will recommend the proper size to use in order to obtain proper diffusion and proper effect.

### Patent Holders

A patent holder is furnished with every Macbeth-Evans candle shade. This holder is made of glass and fits any standard candle-type luminaire, holding the shade in an unvarying vertical position.

For pendant-type luminaires, Macbeth-Evans shades con- equipped with fibre-insulated holders which permit of easy attachment.

### Kitchen—Bathroom

For the kitchen and bathroom—light! "Monax" Glass, plain or simply decorated, means adequate light minus disturbing glare.

### Prices, Etc.

The shapes and decorations here illustrated constitute but a small portion of the complete Macbeth-Evans line. Any Macbeth-Evans dealer will gladly show you other styles to suit your individual purpose. Not only is there a shade or globe to harmonize with every scheme of decoration, but prices are so graded as to come within the means of every home owner. # Utility + Beauty = *Salability*

ANY fixture is bought primarily because of its appearance—or else all fixtures would be standardized. Utility must be there, yes, but it is beauty that allures the eye. And how the beauty of any fixture—from chaste wall bracket to most regal chandelier—is enhanced by Egyptian Lacquer!

Egyptian finish mellows the essential beauty of any metal—and adds a lustrous beauty of its own. Warm to the eye and satin-soft, nevertheless it adds also bull-dog durability.

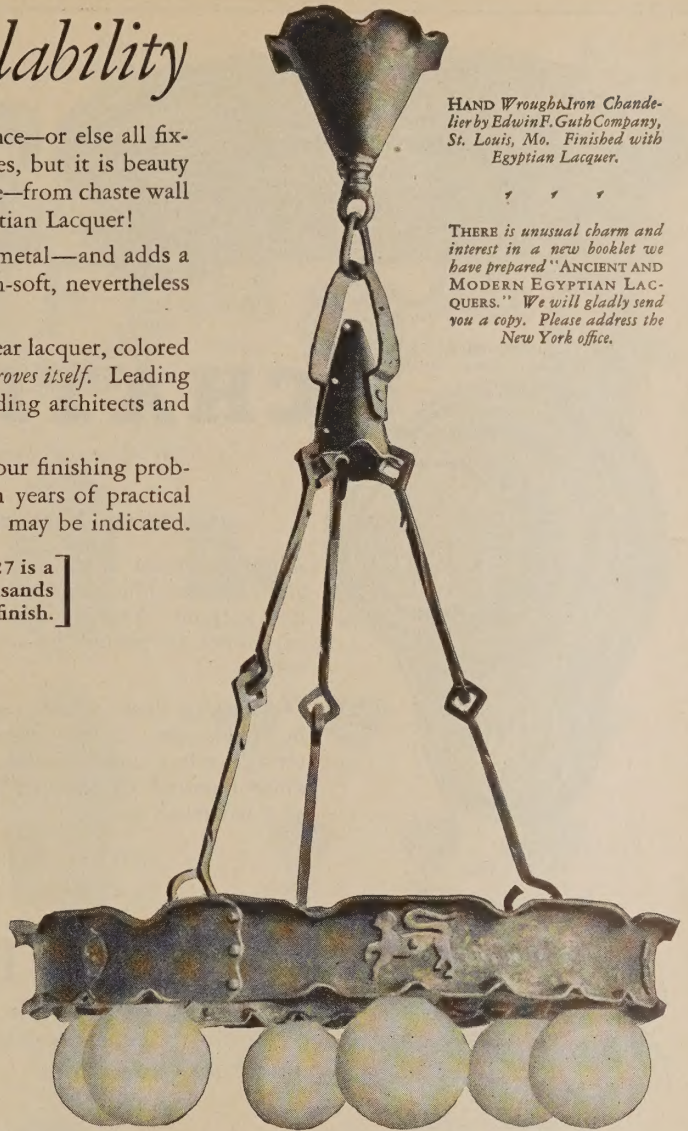

Whatever the metal, whatever the style of finish—clear lacquer, colored lacquer or opaque pigment lacquer enamel—*Egyptian proves itself*. Leading manufacturers report complete satisfaction with it. Leading architects and interior decorators specify it.

Why not let our service department help *you* with your finishing problems? We offer you expert, scientific service, based on years of practical experience. We can fill any unusual "prescription" that may be indicated.

[Egyptian Lacquer national advertising in 1927 is a steady, never-stopping force influencing thousands of people to accept and specify Egyptian finish.]

THE fixture reproduced here is a product of the Beardslee Mfg. Co., Chicago, Ill. The use of Egyptian Products on the complete Beardslee line coincides with their long established policy of using only the very finest materials.

HAND Wrought Iron Chandelier by Edwin F. Guth Company, St. Louis, Mo. Finished with Egyptian Lacquer.

THERE is unusual charm and interest in a new booklet we have prepared "ANCIENT AND MODERN EGYPTIAN LACQUERS." We will gladly send you a copy. Please address the New York office.

*The maker who is proud of what he makes,  
uses Egyptian Lacquer*

FOR OVER 40 YEARS

THIS SYMBOL is the Egyptian Lacquer trade-mark. Its central figure is that of MAAT, the Egyptian Goddess of Truth. It typifies the integrity with which all Egyptian Lacquer products are made... their precision, balance, and true quality... the fidelity with which Egyptian Lacquers meet the particular needs of the manufacturer who seeks true beauty, fine finish and permanent protection for the products that he makes.

## Some of the "BELMET" Line Products

*Many More Items Are Shown in Our Circulars*

### Improved "BELMET" Ruled Adj. X-Bar

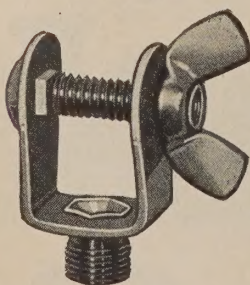

The new improved "Belmet" Ruled Adj. X-Bar, is adjustable from 8" down to 3½", *no cutting off of any parts required*, thereby saving trouble and labor. It will even solve the problem of hanging small Beam Fixtures.

Patent Applied For

The important features of the "Belmet" Ruled Adjustable X-Bars are as follows:

1. Very easy to set perfectly in center, by simply pulling out each side-bar the same distance, from the middle part. Sliding Bars are graduated with Ruled Lines and Numbers.
2. The narrow shape permits all wires to be pulled through easily from Stud Box. No matter whether set for large or small Holder.
3. The center hole always remains the same size, round, and in the center perfectly lined up, when set properly.

### "Belmet" Bridge-Lamp Swivels

"Belmet" Steel Stamped Swivels with Bolts and Wingnuts for Bridge Lamps. Made with special riveting nipples. Swivels can be had without Bolts or Wingnuts.

### "Belmet" Wall Box Straps

"Belmet" Wall-Box Straps are proper to ground and hang Wall Brackets with Knob in center (in the front), on to "Gem-X" or 3 inch and 4 inch Wall-Boxes. Made with ½ pipe or No. 4-27 tapped center hole. Packed 200 to a carton.

### "Belmet" Brass and Steel Candle Sets

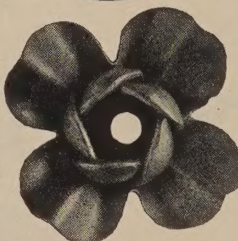

No. 31 "Belmet" Steel Candle Set is the fourth addition to our other styles of Brass and Steel Candle Sets. All of these can be had with Eyelet Holes. We also have Ball Adapter to match the No. 31 set. Also made with smaller Bobach.

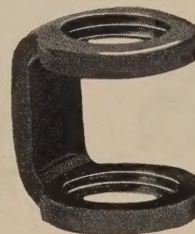

### "Belmet" Iron Fixture Bodies

"Belmet" Iron Fixture Bodies are made in three sizes. These can be had with any number of tapped holes as well as wire-way holes. Made of heavy Steel. Can also be had in Brass on special order.

### One Out of 18 "Belmet" Ornaments

"Belmet" No. 54 Bud-ross is only one of a score of ornaments in Steel and Brass Rosettes, Leaves, Buds and Husks. We are adding some more styles and can make special ornaments to order.

### "Belmet" Hickies Now "Regular"

"Belmet" Stamped Hickies are made in seven styles, in a score of sizes, to take care of almost all requirements where hickies can be used. Most of the sizes are carried in stock or are made up on short notice. *We are the originators of Stamped Hickies.*

### Steel Locknuts With Perfect Threads

Our ⅛, ¼ and ⅜ Locknuts are of the same good quality as all "BELMET" Products.

Steel Locknuts  
⅛, ¼ and ⅜ Pipe

### Steel Washers

For No. 4, ¼" and ⅜ pipe. Other sizes can be had on special order.

Among the other "Belmet" Products not shown here are: Straight Crossbars, Bracket Hooks, Candle Extensions, Cluster Cups, Round Top Finishes, Boudoir Shade Caps, etc.

Made with porcelain knob, brass knob or composition knob. These sockets will harmonize with almost any design of bracket, lending finishing touches to enhance their appearance while, at the same time, eliminating the chipping away of enamel by the jiggling type socket. The porcelain knob is used principally for porcelain bathroom brackets; the brass knob is used on brackets of brass, iron, white metal or composition and can be finished to harmonize. The composition knob will harmonize with any of the above.

# TRIUMPH HARPS

will relieve you of the vexing problem of properly supporting the lamp shade.

There are now over a million in use. This is a significant fact. We specialize in making harps and therefore are able to meet all your requirements.

## The Following Are Our Stock Numbers

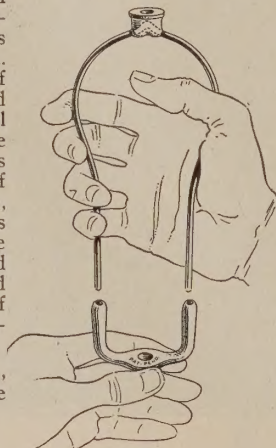

TYPE A

Type A—Made with one single piece of tinned iron wire, No. 8, curved to such a shape as to run solid through the washer-like base of heavy steel stampings. Both ends of the wire are secured together by the cast around head. This is an absolutely reliable construction with an extremely pleasing appearance. Sizes—6 in., 6½ in., 7 in. (inside measurements).

Type C—A demountable harp, also made with one single piece of tinned iron wire, No. 8, but running solid

through the cast around head, with both ends engaging firmly into the brass base casting, drilled ⅝ in. deep. When the sides of the wire are pressed toward the center and a slight pull exerted, the wire will be separated from the brass base casting. In spite of this demountable feature, utmost rigidity and trueness are maintained. This type of harp can be furnished in any desired length and has the added advantage of reducing the size of shipping containers.

Stock sizes—6 in., 6½ in., 7 in. and 7½ in. (inside measurements).

TYPE C

Type F—A socket harp fitting on the thread of a standard lamp socket. Also made with head cast around No. 10 tinned wire, both ends being hooked and soldered into the channel shaped ring.

Stock sizes—3¼ in., 3¾ in., 4½ in. (inside measurements).

All these harps are covered by United States and Foreign Letters Patent or pending applications.

All goods are guaranteed as represented and if not up to standard will gladly be exchanged.

A lacquer sprayed finish on all these items can also be furnished by us at a small additional charge. Samples sent upon request. Deliveries are prompt and our quotations will interest you.

## Specify LIBERTY PRODUCTS

The finished fixture or lamp depends to a great extent for its claim to beauty upon the materials of which it is made. The ease with which the finishing touches of a good job are applied is dependent upon the care with which the parts that are used on it are fabricated and machined.

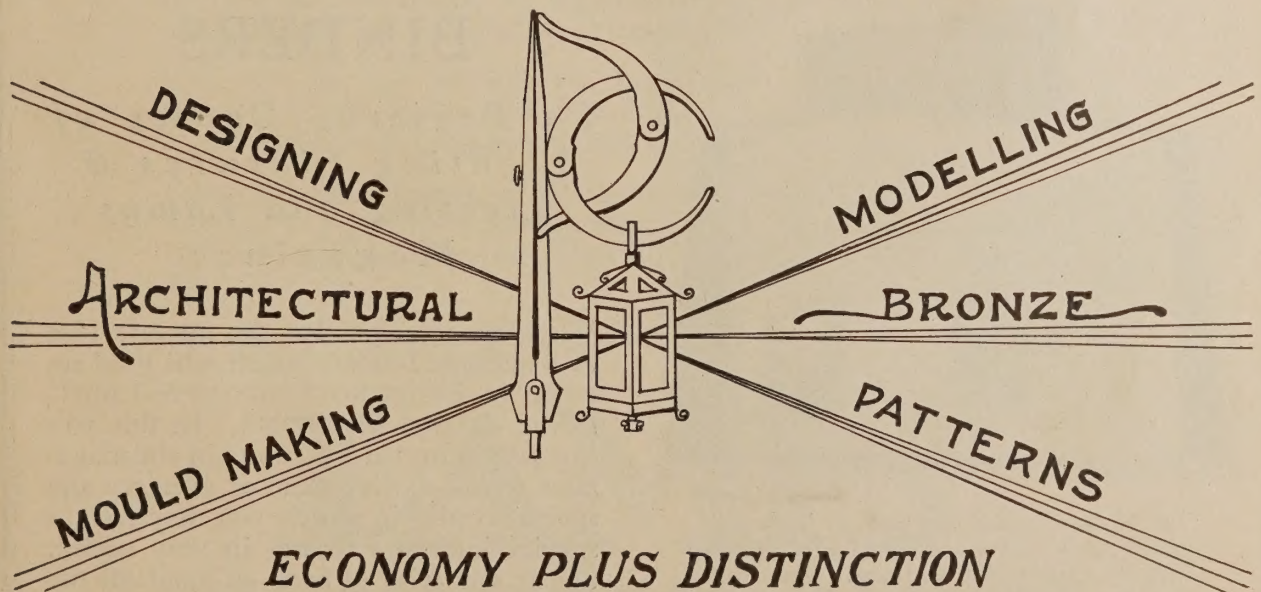

Liberty brass and iron nipples are made with an attention to detail which explains their popularity in the electrical trade.

Liberty steel tubing and pipe are made in any length and bent in any form to meet all demands. You get what you specify when you use Liberty Products. They make your work easier, jobs more profitable and customers better satisfied.

## BINDERS

*To Preserve Copies of  
Lighting Fixtures &  
Lighting and Lamps  
Magazines*

The binder is beautifully made of black seal-grain process leather and is imprinted in gold with the name of the magazine. The covers are limp and the magazines easily inserted.

**Price, Postpaid, \$2.00**

We have arranged for the manufacture of handsome binders which will hold six either of LIGHTING FIXTURES & LIGHTING or LAMPS MAGAZINE. In this you can keep unsoiled the copies of the magazine as you receive them or preserve any special copies in which you may have a special interest. Comes in very useful, too, if you wish to keep on hand all the numbers containing a serial which you are reading.

**KRIEGER PUBLICATIONS**

215 FOURTH AVENUE  
NEW YORK

**I**N every issue of LAMPS we carry more advertisements of lamp and shade manufacturers than any other publication or group of publications. We claim no special credit for this. We simply cite the interesting fact stated above because it proves once more that the specialized magazine will always stand out in its trade, because it can and does best serve that trade.

## In LAMPS you will not find

Radio

Electrical Appliances

Washing Machines

Vacuum Cleaners

Hardware

China, Glassware or Crockery

or a thousand other products having no more to do with the lamp and shade and kindred lines industry than the North Pole has to do with the South.

Add to that, articles in each issue written by experts, who know their subjects intimately, dealing with many phases of lamp merchandising, and you have the reasons for the generous support which the lamp and shade industry has accorded this magazine.

Generous, yes, but practical, too, because the intelligent manufacturer uses for his publicity the publication of his field which, by its very nature, is best calculated to bring him returns.

Coal producers advertise in coal trade magazines, ice machinery manufacturers in publications reaching manufacturers of ice, perfumery manufacturers in magazines reaching buyers of perfumery, and so on down the line.

But lamp and shade manufacturers use

# LAMPS

because it is one hundred per cent specialized for this trade, is published every month in the year, and 1000 picked All-American burglars could not take away its specialized character.

## C O N T A C T

Mr. Manufacturer: This is probably the most important word in your business alphabet. You may get orders through your salesmen and your catalogs, but you must have contact to get your best results.

A salesman who makes frequent calls—a constant correspondence—this is good contact. A greater and better contact develops business and retains a greater good will.

LIGHTING FIXTURES AND LIGHTING makes this possible in the lighting field. Keep up and develop the contact among those who sell lighting fixtures and allied lines. LAMPS, the Specialized Magazine on Lamps and Shades, Metal Furniture and Novelties, etc., is the greatest contact medium for its field. They are read by the heads of firms, by the buyers, by the dealers, by the salesmen, by the lighting engineers, by the lighting specialists, in fact, by practically all of the worth while factors in the distribution of your merchandise.

Each copy of these magazines furnishes a contact with several persons, in addition to the direct wholesale buyer, whose recommendation and good will are worth a great deal to you. A great thing—contact. Keep before your specialized trade constantly by advertising in your specialized trade magazine.
